HOL STAKING

Just as Howard D. Schultz an American businessman said **"Success is best, when it is shared"** We believe that fans/supporters should be part of the success story for each tournament victory financially.

How possible is this?

One popular quote by Brene Brown says it all- **"We share with people who've earned the right to hear our story"**

Illustrating

If we have two competitors (Player/Team A vs Player/Team B)

Prize Pool = \$1,000,000

(Winning Prize)

Sharing ratio = 50% : 45% : 5%

The winner goes home with 40% (which is \$400,000) of the prize pool, second place receives 10% (\$100,000), while those that have staked on the winner will share 45% of the prize pool (\$450,000). Those that have staked on the loser will share 5% of the prize pool (\$50,000).

You don't ever lose your capital (which is the tokens staked) it is always a win win situation for everyone, all you need do, is to send your tokens on passive income errands by just staking.

How much of the 45% that will come to you will be determined by the staking power of your tokens (the quantity in a stake pool. If I stake 5,000 LBT and you stake 50,000LBT, You will get 10x more, so the more tokens you have, the more amount you will get constantly for each tournament as you stake). All tokens staked on a player/team will be 100%, but in that 100% you have your own percentage which will be paid to you during distribution.
